

Carl Candidate

carl@hireflow.test · Remote · github.com/carlc

Summary

Senior backend engineer with 6 years building distributed systems on the JVM. Specialized in Spring Boot microservices, event-driven architecture with Apache Kafka, and PostgreSQL data modeling. Comfortable shipping containerized services with Docker.

Skills

Java 17/21, Spring Boot, Spring Cloud, Apache Kafka, PostgreSQL, MongoDB, Docker, Kubernetes, REST APIs, JUnit, CI/CD, Microservices, Eureka service discovery.

Experience

Senior Java Engineer — Acme Payments (2021–present)

Designed and operated 12 Spring Boot microservices processing 4M events/day over Kafka. Led migration of a monolith to PostgreSQL-backed services, cutting p99 latency 40%. Built a Dockerized CI/CD pipeline and Eureka-based service discovery.

Backend Engineer — DataForge (2018–2021)

Developed REST APIs in Java/Spring, authored Kafka producers/consumers, and tuned PostgreSQL queries.

Education

B.S. Computer Science — State University, 2018
